

i-See

i-See

'The first "tailor made" desktop video magnifier'

A complete and user friendly desktop solution: excellent functionality, adjustable settings to suit the individual and an ergonomic design combined in one device! During the development of the i-See we have taken into account the various needs of a wide range of users and how the device should fulfill those needs.

The i-See can be supplied with the user controls either mounted under the screen, or as a separate remote control unit, the user can decide when ordering. This unique magnifier is able to work with all current TFT-screens between 17" and 22". The i-See can be fully adjusted to the personal needs of the end user.
