

WELLTECH B-CLEAN E-BIDET

**PURE AND NATURAL CLEANSING
ONLY WATER CAN SUPPLY**

SWITZERLAND

COMPLETE YOUR WELLBEING BY USING AN E-BIDET

Water is central to our lives. As well as sustaining and hydrating us, we use water for recreation and to wash, shower and bathe. So, it is a natural step to adopt the practices of many cultures, both ancient and modern, and use water when visiting the bathroom. Using water by choosing an e-bidet enables you to feel clean, refreshed and revitalised after every visit to your bathroom.

Electronic e-bidets seamlessly integrate superior hygiene technology with luxurious comfort and innovative design. The result is an enriched experience that perfectly meets your hygiene and comfort needs. An e-bidet will truly personalise your wash: you can customise the water spray angle, strength and temperature; and you can set the seat's heating level and the warm air dryer's temperature at the perfect volume – all by using an intuitive remote control.

A WELLBEING EXPERIENCE TO SUIT ALL NEEDS

Our range of e-bidets offers a comprehensive selection of standard features available in various eye-catching designs to complement your bathroom style. And our cutting-edge water- and power-saving technology means that whichever e-bidet you choose, it will be as kind to the environment as it is to you.

WE DON'T COMPROMISE. WHY SHOULD YOU?

UNIQUELY FLEXIBLE AND HYGIENIC CLEANSING

Your desire to feel pure, fresh, revitalised and reinvigorated is met with our uniquely flexible nozzle and well-structured wash programmes. You can choose steady, oscillating or pulsating washes, and can adjust the flow rates and nozzle position to be soft or firm – perfectly matching your individual needs. Naturally, the water temperature can be varied for your comfort and cleanliness. Each of our e-bidet and e-bidet seat models feature rear wash and feminine/front wash options as standard. The nozzle is created from anti-bacterial materials and is cleaned before and after washing.

DEODORISER

Once the integrated e-bidet seat sensor recognises that you are seated, the automated deodoriser activates. Utilising the latest activated charcoal filtration technology, the deodoriser rapidly neutralises odours, enhancing your experience and improving your overall wellbeing. Deodorising also prepares your bathroom for your next visit, or its next user.

WARM AIR DRYER

Using the remote control, or integrated seat controls, you can adjust the temperature of the warm air dryer. The resulting gentle air flow across your skin leaves you clean, fresh and dry.

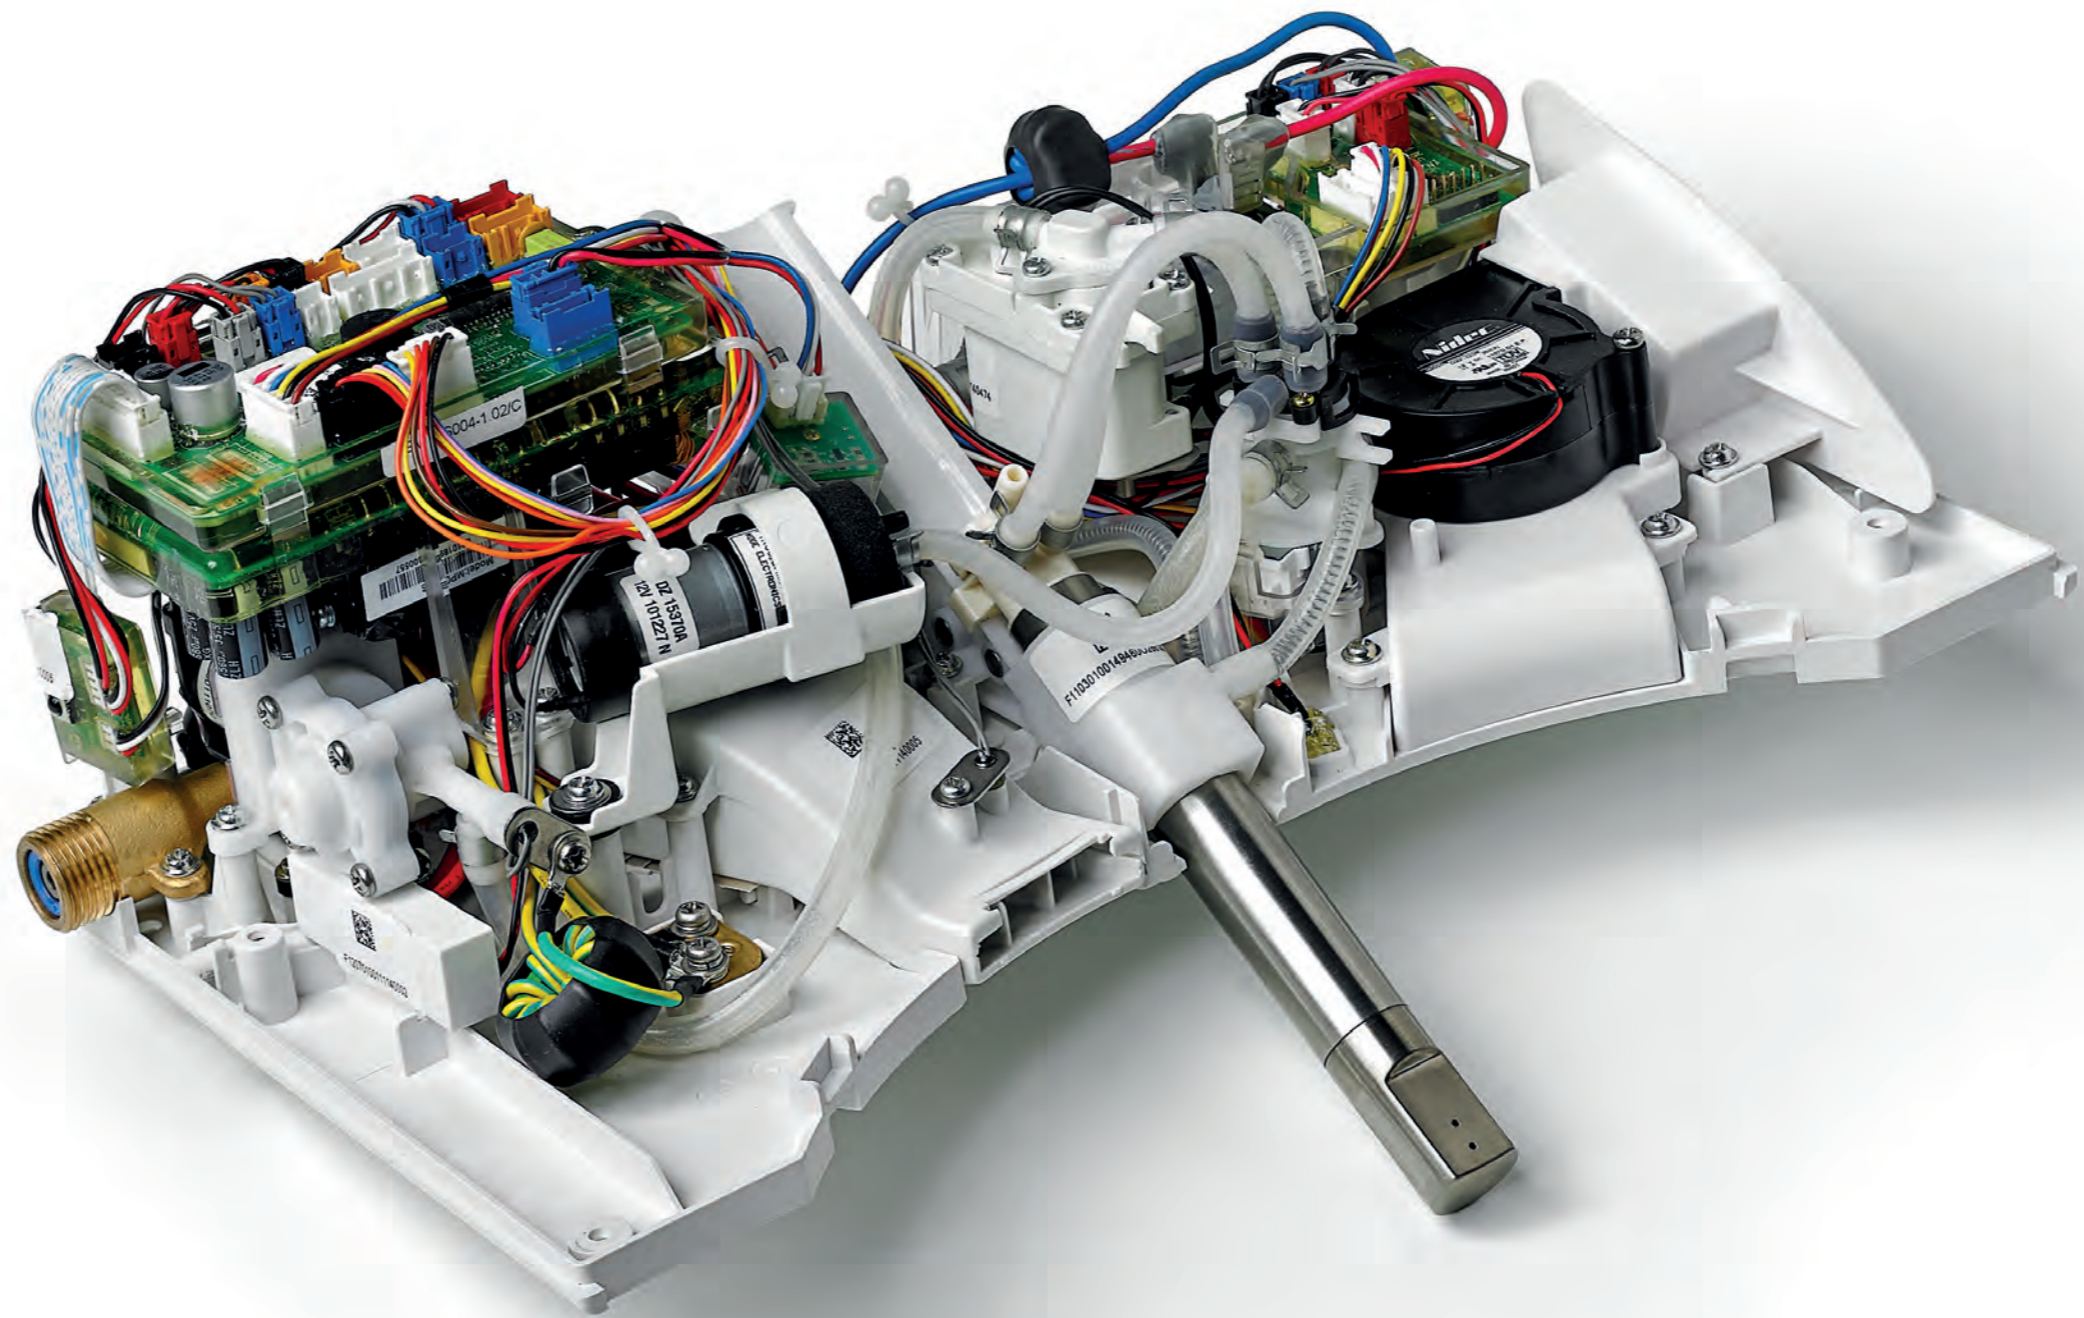

HEATED SEAT

To maximise your comfort as the seasons change, the seat includes adjustable heating that can be set to your individual needs. An integrated sensor detects your presence on the seat and, if set to heat, warming starts immediately.

UNDER THE LID

From the moment you reach for the remote control and open the soft-action lid to the self-cleaning nozzle, your entire bathroom experience is enriched by our superior e-bidet technology. Alongside the advanced antibacterial materials, each e-bidet features multiple wash programmes and temperature controls. Your remote control is intuitive to use and incorporates state-of-the-art technology that can save preset features for up to two users, delivering you complete control over your bathroom experience.

Save energy, water and the environment with advanced water and power saving Eco-module technology. This delivers reduced energy consumption, and features a 'holiday' setting that cuts energy use to zero.

THE ELI IDEAL FOR REFURBISHMENTS

If your desire is to enjoy the pure, refreshed and revitalised feeling of cleanliness that comes with an e-bidet, then specify the Eli for your bathroom refurbishment. All e-bidet seats include fixings, electrical and plumbing connections designed for fast and uncomplicated installation and quick release for cleaning.

Featuring an enclosed seat and classic curves, the Eli can be installed on top of a wide range of WC designs, so you don't have to change your existing bathroom furniture to enjoy the benefits of an e-bidet. It includes the full range of advanced features you would **expect**.

E-BIDET SEAT ELI E005-X401
