Elastic Tube Grip

Description:

Gripeeze® tube strapping system is perfect for sufferers of any ailment or condition affecting their hands when gripping objects. Used for rehabilitation and recovery from sports injury or other medical condition. The tube system offers support for the hand and wrist while the unique strapping system enables you to hold onto everyday objects without putting strain on your injured or recovering hand/arm. Used by Occupational Therapists, Sports Therapist and healthcare professionals to rehabilitate patients and aid in regaining the independence of sufferers from permanent ailments resulting in loss of grip through medical condition or physical/neurological injury.

This solution is just like conventional tube support but with our unique strapping system applied at the wrist making it perfect for gripping any object. Made with flexible materials the tube strap can be applied onto a hand of any size or condition with ease. Available in junior, adult or large adult sizes and in White, Flesh or Black for either left or right hand and all are fully machine washable.

This Gripeeze® product can be used for:

- Rehabilitation
- Sports Injuries
- Bad or Poor Grip
- Physical conditions Effecting the Hands
- Disability

Benefits:

- Machine Washable
- Effective Immediately
- Affordable
- Regains users grip

- Recovery from Injury

Benefits

- Removes strain of gripping
- Great for rehabilitation of injury
- Perfect for sufferers with weak grip
- Proven to aid Stroke patients
- Easy to Apply
- Machine Washable
- Palm padding and fitted for comfort

Description

The Gripeeze® Fingerless mitten is perfect for rehabilitation of sports injuries or any other medical condition such as Arthritis that affect the grip in the hands or for those looking to relieve tension from repetitive tasks. The Gripeeze® strapping system locks your grip in place with the Velcro strap securing your grip and relieving any pressure from the hand/forearm making gripping comfortable, easy and secure even for those with poor or weakened grip. The mitten is also perfect for rehabilitation and for severe conditions affecting the nerves in your hand such as Tetraplegia and Rheumatoid arthritis where deformed or poor joints make it difficult to wear a conventional glove. Used by Occupational therapists and Healthcare professionals to aid in rehabilitation of stroke patients, arthritis sufferers and more.

Made from breathable materials with a leather body they are tough, durable and machine washable.

Available in 5 sizes as a single mitten in either left or right hand.

Home and Garden Glove

Description:

The Gripeeze® Home & Garden gloves, ideal for light garden tasks, housekeeping and with therapy and rehabilitation.

DIY and Garden Glove

This Gripeeze® product can be used for:

- Medium to heavy DIY tasks

Benefits

- Removes strain of gripping
- Great for rehabilitation of injury
- Perfect for sufferers of weak grip
- Fleece Lined
- Fitted For Comfort
- Rubber tipped fingers for added protection
- Neoprene body for flexibility

Description

The Gripeeze® Gloves for DIY and Gardening are made to be tough and durable, made with a breathable neoprene body which keeps the damp and water out, rubber tipped fingers and leather palm padding for protection from roses and sharps on top of a soft leather palm for flexibility.

The real leather Gripeeze® strap wraps over your knuckles to secure your grip taking strain away from any task around the garden or in the home/garage. Simply let go when strapped in and let the glove do the work whilst it relaxes your hand, fingers, wrist and forearm. The strapping system will relieve strain, arthritis pain and pain from injury or medical/neurological condition. Triple lined with cotton and fleece lined for warmth during the coldest months.

Perfect for sufferers of Arthritis, Spinal Injuries, Stroke Patients or any other problem affecting your grip strength or pain in the hands. Tried and tested by gardeners and Occupational therapists and voted as an ideal solution for rehabilitation or for relieving tension in any task whilst doing medium to heavy DIY or gardening.

Perfect for getting back into activity in the garden, garage or even trade work.

Available in 5 sizes and as a single glove or as a pair with left or right hand strapping system.

- Great for rehabilitation of injury
- Perfect for sufferers with weak grip
- Proven to aid Stroke patients
- Easy to Apply
- Machine Washable
- Palm padding and fitted for comfort
- Wrap away strapping system when not required

GRIP-PAR® The #1 Golf Training Glove

Description

R&A Approved (Exception 1 of Rule 14:3)

Grip-Par® Golf gloves are the new and unique training gloves that have become recognised by PGA coaches and professionals around the world as the perfect tool for any golfer and one of the only aids that can help to shape your shots and consistently improve your grip position. As a training tool this glove teaches you to maintain your grip in the optimal position through a variety of shots helping you to improve consistency in the swing stroke and keeping the club face square throughout the entire swing until impact with the ball, resulting in improved accuracy and increased distance.

For the junior or beginner golfer, the glove teaches and trains the fundamentals of a good solid grip position. By using the glove continually the junior or beginner will begin to understand and become natural in the correct positioning of their grip over a variety of shots in either their long or short game on or off the course.

Our gloves have been R&A approved in competition use for players with a hand ailment or dysfunction due to injury or medical condition under exception 1 of rule 14:3

This product can be used for:

- Teaching & Training
- Poor or Weak Grip
- Correcting Common Faults

Benefits:

- Relieves Strain
- Relieves Tension
- Secures your grip
- Easy to use

Grip-Par® Strapping System

All weather Synthetic or Cabretta Leather options for the fingers and palm for the Perfect feel.

Breathable finger holes

Velcro® knuckles section for perfect placement of the strap for any grip style.

Cabretta Leather pad for extra wear on both All Weather Synthetic Leather or Cabretta Leather Options ensuring your gloves last for repetitive play or training.

Velcro® section to secure strap to your knuckles after positioning your grip on the club.

Easy to apply and remove Grip-Par® strapping system

THE GRIP AID STRAPPING SYSTEM

Our strapping system design is a simple yet effective solution for securing your hand in a clenched position. The positioning of our gloves strapping system is designed to be anchored at your wrist with our strap that is applied over the knuckles in a wrist to knuckle movement and affixed to the Velcro which secures your hand in the grip position putting minimum strain on the muscles that enable your hand to grip. Common problems that are associated with the pain in the hands and fingers are:

- Arthritis
- Osteoarthritis
- Carpal tunnel syndrome
- Tendonitis
- Tenosynovitis
- Tennis elbow
- Golfer's or baseball elbow

When our strap is applied to a glove, mitten or medical device it removes the requirement to use the muscles and tendons that are affected by these types of conditions. Easy to apply and remove and fitted for size, the strapping system developed by Grip Aid is a user friendly solution for patients, sufferers and healthcare professionals for aiding in prevention and rehabilitation or day-to-day activities that involve holding or using your hand to grip objects.

TESTIMONIALS

Simply an amazing design, my 7 year old son has cerebral palsy with limited use in his right hand. I've spent 2 years trying to find gloves that will help him play golf and ride his bike like his twin brother, this glove does all of that. James is delighted with his new glove it enables him to take part and in his own words "it looks just like all the other boys gloves. I've always believed that James can do whatever he sets his mind too this gloves enables him to achieve this. Thank you. *Kerrie Spiby*

We are a team of Occupational Therapists working on a private spinal cord injury unit. Our patients that have looked at your products are those with tetraplegia and we have been recommending them as a splint to maintain range of flexion in the finger joints. Our clients have tried the gripeeze sports grip and the mitten grip and both us as therapists and the patients have found them to be an effective splint for this purpose.
Miranda Cook – Head OT Royal Buckinghamshire Hospital

I personally would recommend the gloves during rehabilitation phase for Stroke patients and for patients who suffer arthritic conditions. I believe this glove can enhance the daily life for those who have had to reduce day to day activities such as DIY, Gardening and sport activities.
Gina M Riccio – IIST VCTC ITEC – Level 5 Sports & Rehabilitation Therapist

What an excellent product! I suffer from rheumatoid arthritis and have tried many items to help me grip a golf club and so continue to play. My occupational therapist gave me hand splints and I had arthritic grips fitted to all my golf clubs! However my golf coach pointed out this was interfering with wrist break. Since receiving my glove I have seen my game transformed and the feeling of confidence I have convinces me I have many more golfing years ahead of me. Many, many thanks. *Mrs. Lockerbie*

I purchased a glove after a trial fit & demonstration at Bents Garden Centre. I had a stroke in May of 2011, which left me with a clumsy right arm, but using your glove has enabled me to use hand tools safely, and gives me much better control. I can even get back to doing D.I.Y., and spend more time in the garden using the glove with the hoe, trowel spade , brush pan and other tools. I have spoken with the stroke association giving them your company name and address so that other people like me are aware and can benefit from your product thank you. *Arthur Ethell*

I couldn't believe the difference such a simple idea would make. *Glyn Jones*

I have Arthritis quite badly in my legs and feet and unfortunately it is moving to my hands. At the age of 89 it is quite a lot to expect miracles to happen, however these gloves have helped me. *Muriel Ayres*
