

# VOX series

Facilitate everyday life with modern reading systems

# We're here for you

Since 1971 Reinecker develops premium video magnifiers and reading systems that help you to independently read text and watch pictures in newspapers, magazines, letters and cook books – despite any visual impairments.

Our goal is to improve the quality of your life.

We offer a wide range of magnifying and reading systems that can be used on the go, at your workplace, while at school, college or university and in the comfort of your own home.

With the support of our world wide partner network, we will help you determine the best magnifying or reading system to suit you.

## Reinecker Vision

# Everything from one source

If your vision declines considerably at an older age or as a result of an eye disease, a wide range of assistive devices can help you manage your everyday life. We are happy to help you put together individual solutions to improve your daily life. Your individual product combination fits together like pieces of a puzzle.

## Our product range for your well-being

- ▶ **Electronic magnifiers: MANO**
- ▶ **Video magnifiers: mezzo, VEO, VERDE**
- ▶ **Camera systems: topolino**
- ▶ **Reading systems: VOX**
- ▶ **Low Vision aids: Optima TV**
- ▶ **Accessories: XY-tables, height adjustable tables, etc.**

## Product range

# Reading systems

Reading systems help highly visually impaired or blind people to read text individually and independently. The systems convert text to speech and read them out with a clear voice. Volume and speed of the voice can be adjusted individually.

Reading systems capture printed text with a scanner and digitise it by using a text to speech e.g. OCR-function\*. Large buttons in different shapes help the user to operate the system with ease. Most reading systems are designed for the mobile use. Some systems are equipped with a low vision function.

Find out more about our reading systems in this brochure.

\* OCR = optical character recognition

**Facilitate everyday life with modern reading systems**

„High quality reading function and modern, smart design.“

# VOX*box*

VOX*box* is a modular and multifunctional reading system with a compact, user-friendly design and an intuitive operation concept.

By pushing a single button documents are captured easily by the powerful external scanner within a few seconds. The scanner is not linked to the system and can be placed anywhere. Then texts are read out by a clear and natural sounding voice. Reading speed and sound volume can be adjusted individually.

VOX*box* is designed as a lightweighted, practical bag. Therefore it can be transported ergonomically and is immediately ready to start.

If required the reading system can be expanded with a battery or a low vision module. Connecting VOX*box* to a monitor makes it to a combined reading and magnifying system.

## The modular reading system

## VOX<sub>box</sub> – your benefits at a glance

- high quality reading function: reading out loudly with a clear and natural voice, individual adjustment of reading speed and sound volume, navigation per paragraph, sentence, word or letter
- powerful scanner for DIN A4 documents: can be placed flexibly
- intuitive operation concept via removable control unit with clearly arranged buttons
- mobile, smart design: designed as a practical bag
- available options: battery, low vision module

**modular**

**intuitive**

**mobile**

# VOX*viva*

VOX*viva* combines a reading system with a video magnifier in a small camera that can be connected to a PC or a laptop.

In camera mode the user sees the live image of the camera and can use the mouse navigation without having to move the original. In documents mode VOX*viva* reads out loudly documents. At the same time the user can view them in a magnified mode and in the required colour combination on the monitor.

Choose from six different display modes e.g. the overview mode, representing the scanned document in your favourite colour combination. Choose between different display modes e.g. line by line or one word per line.

Operation is simple via your notebook- or PC keyboard or via a separate control unit. With the computer mouse images can be moved and magnified on the screen.
