

AEROLET®
care lifting solutions

Living independently at home for longer
Relief of caregiving tasks

Self-Reliance in Healthcare

Daily activities such as sitting down, standing up, and showering may seem self-evident, until these movements become more difficult. At that moment, the right support can make a significant difference in maintaining comfort, safety and dignity.

In daily practice, care professionals assist clients with these activities. This requires attention, time, and often considerable physical effort. At the same time, the healthcare sector worldwide is under pressure due to an ageing population and an increasing demand for care.

Promoting self-reliance therefore plays a crucial role. When people are able to perform daily activities independently for longer, it directly contributes to their quality of life. At the same time, it helps reduce the physical strain on care professionals and keeps the workload in healthcare manageable.

Enschede | The Netherlands

Solutions for everyday care practice

Aerolet develops and manufactures assistive devices that support users in the toilet and bathroom. Our systems are designed to make sitting down and standing up safer, more comfortable and easier. By guiding and/or supporting natural sit-to-stand movements, Aerolet helps users perform these everyday activities independently for longer. At the same time, Aerolet products support care professionals in an ergonomically responsible way.

Aerolet products are used worldwide in various care environments, ranging from home care and care facilities to rehabilitation centres and hospitals. Thanks to their well-thought-out design, the systems can be easily integrated into both existing environments and new construction projects.

Solutions that make a difference

Optimal support when sitting and standing

Our systems support users in a safe and natural way.

Maximum self-reliance

Daily activities in the toilet or bathroom can be performed independently for longer.

Ergonomic relief for care professionals

The systems reduce physical strain during transfers.

Flexible and universally applicable

Suitable for both existing situations and new construction projects.

Internationally certified quality

Fully compliant with MDR regulations and certified according to ISO and TÜV standards.

Durable solutions for everyday use

Designed for intensive use with a proven long service life.

Our product range

Solutions for different care situations

Aerolet offers a wide range of solutions to support users in the bathroom and toilet.

The range varies from high-quality lifting systems and toilet support rails to shower toilets. These products are specifically designed to promote the user's independence and enhance safety in sanitary areas.

TILTING STAND-UP TOILET LIFT

Tilting STAND-UP Toilet lift

Natural support with every movement

The tilting STAND-UP toilet lift supports the natural way of moving when sitting down and standing up, reducing the required muscle effort by up to 75%. The movement is comfortable, precise and safe, as the lift can be fully adjusted to the user's body height.

The lift can be easily operated via push-button, foot, or hand remote control and is available with fixed, foldaway, or movable armrests.

With various models and the ability to support up to 250 kg, the toilet lift offers a suitable solution for a wide range of needs.

The lift can be installed on an existing toilet and is compatible with wash-dry systems.

An optional battery system allows the lift to continue functioning during a power outage or when no electrical outlet is nearby.

**Follows the body's natural movement
when sitting down and standing up.**

Dutch Manufacturer
MDR, ISO & TÜV certified
IPX4 waterproof
5-year manufacturer's warranty

VERTICAL
STAND-UP TOILET LIFT

Vertical STAND-UP Toilet lift

Independent stand-up with maximum support

The vertical STAND-UP toilet lift assists people who have difficulty sitting down and standing up due to limited hip and/or knee flexion, muscle disorders, or transfers. Through its controlled vertical movement, the system helps the user safely move up and down in a stable manner, maintaining independence and significantly reducing physical strain for caregivers.

The lift can be easily operated via push-button, foot, or hand remote control and is available with fixed, foldaway, or movable armrests. With various models and the ability to support up to 250 kg, the toilet lift offers a suitable solution for a wide range of needs.

The lift can be installed on an existing toilet and is compatible with wash-dry systems.

An optional battery system allows the lift to continue functioning during a power outage or when no electrical outlet is nearby.

More comfort for the user, less physical strain for caregivers.

Dutch Manufacturer
MDR, ISO & TÜV certified
IPX5 waterproof
5-year manufacturer's warranty

Control options

The various control options ensure ease of use in every situation, making the lift simple to operate for both the user and the caregiver.

EASY-TO-OPERATE BUTTONS

PUSH CONTROLS IN ARMREST

HAND REMOTE CONTROL

FOOT CONTROL

VERTICAL
SHOWER LIFT

Vertical SHOWER lift

Safe and comfortable showering

The vertical shower lift enables safe and comfortable showering, even when standing, sitting, or rising is difficult. The easily operated push-button allows the seat height to be adjusted to the user's personal preference.

The ergonomically shaped backrest and foldaway armrests provide a stable and comfortable seating position during showering. When not in use, the seat and armrests can be folded away.

Wall mounting makes the lift easy to install while keeping the bathroom accessible and uncluttered. The shower lift also significantly reduces physical strain for caregivers and family members.

More safety for the user, less strain for caregivers.

Dutch Manufacturer
MDR, ISO & TÜV certified
IPX4 waterproof
5-year manufacturer's warranty

TILTING STAND-UP TOILET LIFT

Easylet Tilting Toilet lift

Natural support when sitting and standing

The Easylet tilting toilet lift is designed for people who need extra support when sitting down and standing up from the toilet. Thanks to its tilting movement, the lift follows the body's natural standing-up motion, making the movement less effortful while providing a more comfortable and secure experience.

During the STAND-UP movement, the armrests move along, giving the user additional stability and confidence. The lift can be easily operated via a push-button or hand remote control.

The Easylet tilting toilet lift is compatible with almost any standard toilet and can be used with wash-dry systems. With a load capacity of up to 150 kg, this lift offers a practical solution for home care and independent living.

An optional battery system allows the lift to continue functioning during a power outage or when no electrical outlet is nearby.

**Follows the body's natural movement
when sitting down and standing up.**

VERTICAL
STAND-UP TOILET LIFT

Easylet Vertical Toilet lift

Comfort and support with every movement

The Easylet vertical toilet lift provides reliable support for people who have difficulty sitting down and standing up from the toilet. The vertical lift motion helps the user rise in a controlled manner, requiring less effort to stand.

The moving armrests provide extra stability and support throughout the movement. With simple operation via push-button or hand remote control, the lift is easy to use.

The Easylet vertical toilet lift is compatible with almost any standard toilet and can be used with wash-dry systems.

With a load capacity of up to 150 kg, it offers an accessible solution for home care and independent living.

An optional battery system allows the lift to continue functioning during a power outage or when no electrical outlet is nearby.

Reliable support with every movement

Dutch Manufacturer
MDR, ISO & TÜV certified
IPX4 waterproof
2-year manufacturer's warranty

EASYUP
SUPPORT ARMS

EasyUP Support arms

Stable support when needed

The EasyUP toilet support rail provides extra assistance for safely sitting down and standing up from the toilet. By offering a stable support point, the rail helps users perform this movement in a controlled, comfortable and secure way.

Two models are available. One model is easily mounted under the existing toilet seat on the ceramic, while the other model is mounted between the wall and the ceramic, making it an excellent fit for use with integrated wash-dry systems.

Depending on the model, the armrests are either fixed or foldaway. On both models, the armrests are height-adjustable, allowing the support to be optimally tailored to the user.

With a load capacity of up to 150 kg, the EasyUP provides durable and reliable support in any bathroom.

More confidence and safety with every movement.

GEBERIT
AquaClean MERA

GEBERIT AquaClean Mera

Advanced shower toilet technology for maximum hygiene

Integrated shower toilet systems support users with personal hygiene while enhancing comfort and independence during toilet use. At the same time, they help caregivers reduce physical strain and improve bathroom hygiene.

Fully integrated shower toilet

The Geberit AquaClean Mera is a fully integrated shower-toilet, with all technology built into the ceramic.

The patented WhirlSpray shower technology cleans with a pulsating, air-enriched water jet. This provides a gentle yet thorough cleansing, which is especially beneficial for users with sensitive skin or incontinence issues.

The rimless ceramic combined with the powerful TurboFlush flushing technology ensures an extremely hygienic toilet bowl that is easy to keep clean. For care facilities, this means less use of toilet brushes and a lower risk of cross-contamination between residents.

In addition, the AquaClean Mera features comfort functions such as automatic deodorization, user detection, and orientation lighting, contributing to a safe and comfortable experience for both users and caregivers.

For a fully integrated solution, the AquaClean Mera and the Aerolet toilet lift are fully compatible and work seamlessly together.

Integrated shower toilet that combines hygiene, comfort and independence.

Swiss shower toilet technology
WhirlSpray for optimal personal hygiene
TurboFlush flushing system with high performance
Rimless ceramic to prevent bacterial buildup
Less toilet paper and reduced infection risk
EN-, CE- and ISO certified

GEBERIT
AquaClean TUMA

GEBERIT AquaClean Tuma

Flexibel shower toilet solution for existing toilets

The Geberit AquaClean Tuma makes it easy to upgrade a standard toilet with a shower function. This provides an accessible solution that supports personal hygiene while enhancing comfort and independence, both in care facilities and at home.

Shower function on any existing toilet

The Tuma can be installed directly on an existing toilet without replacing the entire ceramic. The system is also available as a set with matching Rimfree ceramic for those who want a complete solution.

The integrated WhirlSpray shower technology cleans with a gentle, pulsating, air-enriched water jet for effective and comfortable hygiene. Rimless ceramic combined with TurboFlush flushing technology ensures a hygienic toilet environment that is easy to keep clean. The AquaClean Tuma therefore provides a practical solution for both care facilities and home care situations.

Thanks to intuitive controls and an accessible design, users can easily operate the system. This helps them maintain independence in daily routines while reducing physical strain for caregivers.

The AquaClean Tuma can be combined with the Aerolet toilet lift, ensuring maximum autonomy for the user.

A smart upgrade that transforms a standard toilet into a modern shower toilet.

Swiss shower toilet technology
Retrofittable bidet system for existing toilets
WhirlSpray shower function for gentle cleansing
TurboFlush
Rimless with Geberit Rimfree ceramic
Enhanced hygiene and independence for users
EN-, CE- an ISO certified
