

# handSteady®

## Unique Cup with a Rotatable Handle™ and Lid.

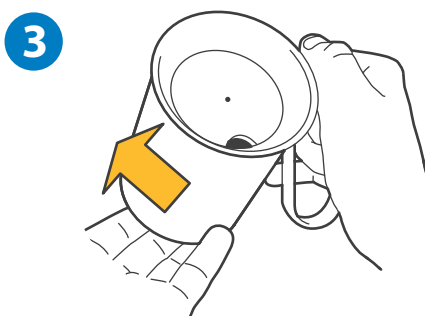

### Purpose

To enable easier drinking for people with reduced grip, hand or arm function.

### Description

This unique drinking aid has been designed for those who have limited dexterity, experience hand pain, swallowing difficulties, tremors, reduced coordination or weakness.

It has a large Rotatable Handle™ which allows the user to hold the handle in comfortable and stable positions to minimise tremors and wristpain. Gravity keeps the cup upright and steady.

To drink from the cup, place the Hidden Lid™ on the cup, hold the handle at the most comfortable angle and use the thumb, mouth or the other hand to control the tilting.
