LIFE WITHOUT LIMITATIONS

Patent-Pending

MORE THAN A

WALKER ROLLATOR STAIR CLIMBER

IT'S A LIFE CHANGER

When we searched the world for a mobility aid that could help people ambulate - not only on a flat surface, but on various slopes and conditions - there were no options. In fact, there are no progressive mobility aids available today that can adapt to the changing needs of the user. This got us thinking about this unmet need in the mobility space. We went to work on designing a new-to-the-world device that would give mobility challenged the freedom to go where they choose, without limitations.

A walker, rollator, and stair climber in one makes Roami the first of its kind and a major advancement in the mobility aid marketplace. Its easy-to-use features allow the user to alternate between walker and rollator with the simple tap of a pedal and to climb stairs and inclines safely.

Engineered for quality with precision crafted components, along with a thoughtful design for the aesthetic, Roami stands out as equally sophisticated and functional.

With Roami, live without limits.

roami

Patent Pending

THE ROAMI LINEUP

A VARIETY OF COLORS

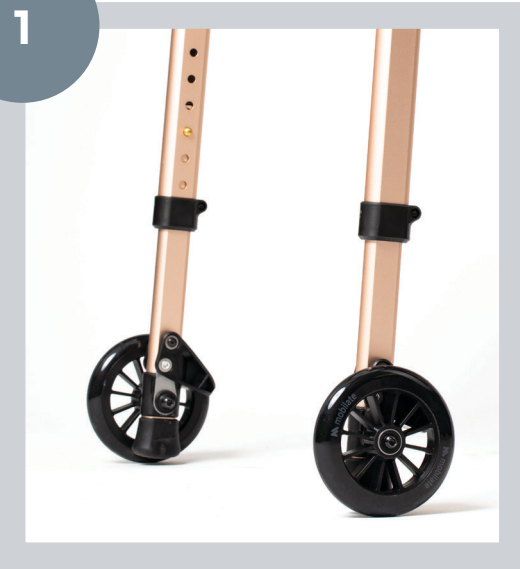

FOR A VARIETY OF LIFESTYLES

Patent Pending

EASY AS 1,2,3 GO

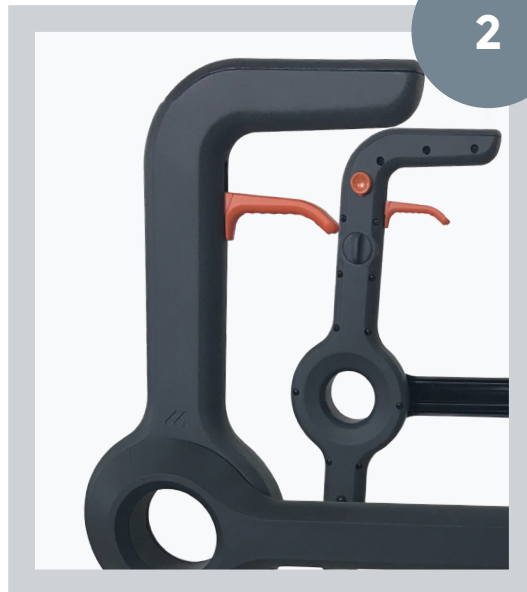

1

WHEELS UP

One touch of the pedal automatically retracts the wheels.

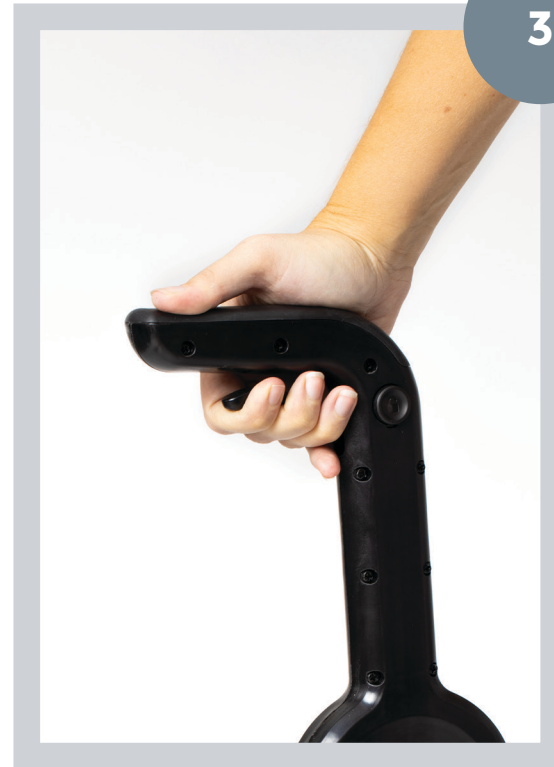

2

PRESS SAFETY BUTTON

The button allows users to acknowledge then release lever.

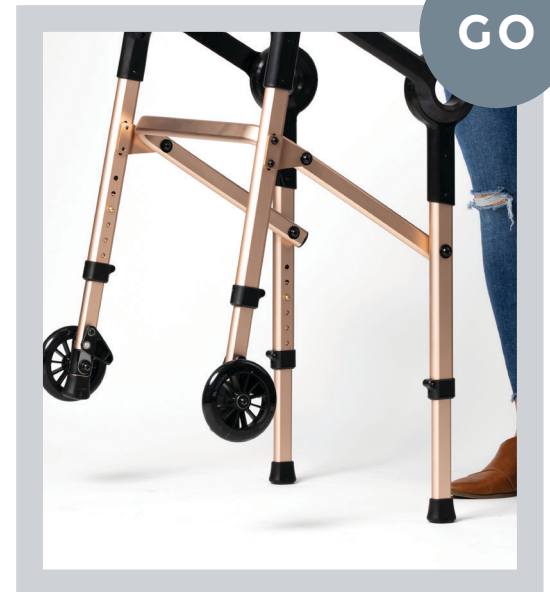

3

SQUEEZE LEVER

Release allows Roami to automatically adjust to the surface.

GO

TAKE OFF

Roami is locked into place and ready to climb.

SELF-LEVELING
